PROFILE

Experienced Senior Engineer with 4+ years in web and software development, bringing a total of 7 years of professional expertise

PROFESSIONAL EXPERIENCE

Senior Engineer 05/2023 – Present

Fractal Analytics Bangalore, India

- Developing User Interfaces: Implemented responsive user interfaces using HTML, CSS, and JavaScript frameworks like React. Ensured cross-browser compatibility and pixel-perfect designs
- Optimizing Performance: Improved application performance by optimizing code and implementing best practices
- Collaboration: Worked closely with designers, backend developers, and project managers to ensure cohesive project execution. Participated in Agile development processes, including standups and sprint reviews.
- Testing and Debugging: Conducted thorough testing using tools like Jest, to ensure the delivery of high-quality features. Debugged UI/UX issues in development and production environments.
- Optimized application performance, ensuring fast load times and smooth user experiences.
- Conducted code reviews and provided feedback to maintain code quality and best practices.
- Utilized version control systems (e.g., Git) to manage and track code changes.
- Mentored junior developers, providing guidance and support in Reactjs and general programming practices.
- Implemented unit testing and end-to-end testing to ensure the reliability and stability of the application.

Engineer 07/2022 – 05/2023

Senseforthai (a Fractal company) Bangalore, India

- Developed responsive and user-friendly web pages using Reactjs, HTML, CSS and javascript.
- Worked closely with UX designers to create visually stunning designs and implemented using CSS.
- Collaborated with backend developers to integrate front-end code with server- side APIs.

Programmer 07/2021 – 07/2022

Perfect & Complete Solutions Pune, India

- Designing user interactions on web pages.
- Integrating our front-end UI with the constructed API.
- Build the front-end of applications through appealing visual design.

- Collaborated with senior developers to implement new features and improve existing ones.
- Participated in code reviews, providing and receiving constructive feedback to ensure code quality.
- Worked closely with UI/UX designers to ensure seamless user experiences

Programmer 01/2020 – 12/2020
Ultimosoft Hyderabad, India
- Successfully maintained all responsibilities of accounting manager along with Netsuite Administrator.
- Test and deploy NetSuite customizations and new functionality based on changing business needs

Senior Process Executive 08/2017 – 11/2019
Cognizant Hyderabad, India
- Worked on GRM tool and ICS which helps in finding the company information.
- Meeting daily targets and following up with Team Lead.

SKILLS

Reactjs, JavaScript, HTML5 & CSS3, Redux, Node.js, Responsive Design, Git & Version Control, Python, FastAPI

PROJECTS

Cogentiq 09/2024 – Present
An Agentic Al Platform for Enterprises
Project Description: **Cogentiq** is an AI-driven decision intelligence platform developed by **Fractal Analytics**. It enables organizations to automate data-driven decision-making by providing real-time insights and predictive analytics through advanced machine learning models. The platform is designed to optimize business processes and drive smarter, faster decisions across various industries.
Key Responsibilites:
- Developed and maintained the **user interface** for **Cogentiq**, an AI-powered decision intelligence platform, ensuring a seamless and responsive experience for business users.
- Contributed to the development of **Cogentiq**, an AI-powered platform designed to automate and optimize decision-making through advanced machine learning models and real-time analytics.
- Focused on creating intuitive and responsive **frontend interfaces**, enabling users to visualize complex data insights and predictive analytics via interactive dashboards.
- Implemented data integration with backend systems to display real-time business intelligence, improving user decision-making efficiency.
- Enhanced the platform's performance and **user experience (UX)** by optimizing frontend components and ensuring seamless interaction with the backend APIs.
- Collaborated closely with cross-functional teams, including data scientists and UX/UI designers, to ensure the platform met both functional and user-centric requirements.

Vadi 01/2023 – Present
An Al playground
Project Description: An AI playground tailored to basic QnA, Summarization, Financial Analysis, and Data Insights of both structured and unstructed data.

- Solely responsible for the Frontend Development of the Al playground, ensuring a user-friendly and intuitive interface.
- Developed the Chat Page to facilitate basic QnA interactions with users.
- Developed key features for the Al playground, including a Summarization Module to provide concise summaries of lengthy texts, a Financial Analysis Page to deliver insights and analysis of financial data, and a Data Insights Page to analyze and visualize both structured and unstructured data.

Aggreg 03/2024 – 09/2024

AggRag is a sophisticated platform designed to streamline the integration and deployment of multiple RAG(Retrieval-Augmented Generation) systems into a single, cohesive solution.

Marshall bot 11/2023 – 01/2024

Assisted in the development of a chatbot for Marshall Goldsmith, providing support across various screens and functionalities.

TPG Hackathon 10/2023 – 11/2023

for a client demo

Developed a comprehensive Al solution for a client demo, focusing on handling and analyzing various financial documents to generate insights and summaries. This project covered structured and unstructured data, providing advanced querying and summarization capabilities.

Flyfish 07/2022 – 04/2023

Project Description: Developed a custom chatbot solution capable of being deployed on various websites. The project included generating an SDK link that could be integrated into websites to display the chatbot functionality.

- Key Responsibilities
- Designed and developed the Bot Builder Page to allow users to create and customize their chatbots.
- Worked on the Components page, implementing modular and reusable components for the chatbot interface.
- Developed the Configure Page to enable users to set up and configure the chatbot according to their needs.
- Ensured the responsiveness of the chatbot across different devices and screen sizes, providing a seamless user experience.

WhatsappBSP 10/2022 – 01/2023

Solution for creating and managing WhatsApp campaigns, enabling users to send messages to all contacts efficiently. The project aimed to enhance communication and marketing efforts through automated messaging.

NVestigator 2023

AI Assistant for NVIDIA'S HER Team

- An AI assistant for NVIDIA'S HER Team which would enable interactive and informative experience for end-users.
- The system would allow the team to explore a large set of research papers(or other document types) from different perspetives that can help take actionable decisions in a more speedy and efficient manner.

EDUCATION

B.Tech 09/2013 – 06/2017
Malla Reddy College of Engineering and Technology Hyderabad, India

MPC 06/2011 – 05/2013
New Era Jr College Hyderabad, India
